CHAIRMAN *Message*

“Diversification Drives Growth”

For many years, our Group has built a strong reputation and solid foundation within the digital printing and print finishing industry. Through dedication, innovation, and the unwavering commitment of our people, we have earned the trust and confidence of customers across multiple industries.

However, market dynamics are changing rapidly. Customer expectations continue to evolve, while increasing competition from online businesses and the declining demand for certain traditional products are reshaping the industry landscape. **In today's environment, diversification is no longer merely an option – it is a strategic necessity for sustainable growth and long-term resilience.**

As part of this transformation, we are actively expanding into new business opportunities and market segments that complement our existing strengths, technical capabilities, customer relationships, and service expertise. These new directions will allow us to leverage our current foundation while creating additional revenue streams and long-term business sustainability.

Diversification is not simply about introducing new products or services. More importantly, it is about creating new market opportunities, exploring new applications, and adopting a broader growth mindset. It requires us to become more proactive, more innovative, and increasingly customer-focused in everything we do. This transformation cannot be achieved by management alone. Every employee, department, and company within the Group plays an important role in driving this strategy forward. We must challenge traditional boundaries, embrace change positively, and actively contribute ideas, initiatives, and solutions that support business growth.

Moving Forward Together

The journey of diversification will require commitment, resilience, teamwork, and the courage to adapt in a changing marketplace. While challenges will undoubtedly arise, there will also be tremendous opportunities for those who are prepared to grow with the company.

I firmly believe that with our collective strength, experience, and determination, we can successfully transform our Group into a more diversified, future-ready, and sustainable organization.

**Together, we will create new opportunities.
Together, we will build long-term resilience.
Together, we will achieve greater growth.**

Mr. Tony Tee Boon Chai
Group Chairman/ Group Managing Director

GALAXY GROUP OF COMPANIES ANNUAL GENERAL MEETING 2025

"Mindset Transformation" – Building a Stronger Future Together

The Galaxy Group of Companies successfully concluded its 2½-day Annual General Meeting (AGM) 2025, bringing together management teams, associate companies, branch leaders, and employees under the unifying theme of "Mindset Transformation."

The AGM served as an important platform for strategic alignment, leadership engagement, performance recognition, and team appreciation as the Group continues strengthening its position in an increasingly competitive business environment.

The event commenced with individual associate company management meetings, where each company presented its business performance, operational achievements, market challenges, and growth strategies. These sessions encouraged open discussions, cross-company collaboration, and the exchange of ideas to enhance operational excellence and business synergy across the Group.

A key message throughout the AGM was the importance of mindset transformation at every level of the organization. As industries continue to evolve rapidly, our Group Chairman emphasized that sustainable growth can no longer rely solely on traditional approaches. Employees and leaders were encouraged to embrace adaptability, innovation, accountability, and continuous improvement to capture new opportunities and strengthen competitiveness.

One of the main highlights was the Annual Staff Meeting, which brought together all Galaxian in a spirit of unity, celebration, and shared purpose. During the session, Group leadership reaffirmed its commitment to business transformation, talent development, customer-centric solutions, and long-term sustainable growth.

In recognition of outstanding contributions and achievements, numerous awards were presented, including the Top Sales Personnel Awards, Top Technical Sales Awards, Outstanding Associate Company Award, and Outstanding Branch Award.

These awards recognized not only business performance, but also the dedication, teamwork, and passion demonstrated by employees in driving the Group forward.

A memorable highlight of the AGM was the special Mother's Day celebration dedicated to all Galaxian mothers during the staff dinner. The surprise appreciation segment reflected the Group's strong family-oriented culture and appreciation for the important role mothers play both at home and in the workplace.

The AGM concluded on a positive note with renewed energy, stronger alignment, and a shared commitment to embracing change and driving future growth through mindset transformation.

As Galaxy Group of Companies moves forward, the Group remains committed to fostering a progressive culture built on innovation, collaboration, resilience, and continuous learning – creating a stronger, more agile, and future-ready organization for the years ahead.

A key message throughout the AGM was the importance of mindset transformation at every level of the organization

NEW OFFICE OPENING

GALAXY AUTOMATION IPOH

Galaxy Automation's Ipoh Branch officially reopened its doors on 10th June 2025, marking a significant milestone after a 2½-year hiatus. This reopening reflects the branch's renewed commitment to delivering excellence and expanding its reach in the region.

Now located at 13, Jalan Lapangan Perdana 19, Taman Lapangan Setia, Ipoh, Perak, the newly refurbished office offers expanded space and upgraded facilities to better support operations and customer engagement.

The ceremony was officiated by Group Chairman and Managing Director Mr. Tony Tee, alongside Mr. Tan Boon Kiat, Group Corporate Affairs and Operations Director, and Mr. Khung Shyang Loon, Group Sales and Marketing Director of Galaxy Automation, together with senior staff members.

With this strategic move, the Ipoh Branch is poised to grow its customer base and introduce a broader range of innovative products and solutions.

Marking a significant milestone after a 2½-year hiatus. This reopening reflects the branch's renewed commitment to delivering excellence and expanding its reach in the region.

BIOZONE VISIT

We were honored to welcome our principal team from Biozone to Galaxy led by the CEO Mr Don Taylor, and Mr Goo Peng Chan, the Territory Sales Consultant. The visit served as a significant platform to discuss the progress of our ongoing projects, while also aligning our vision and mission to strengthen future collaboration.

We shared updates on current deliverables, explored potential areas for improvement, and addressed upcoming project milestones. Both parties focused on reaffirming our shared vision of delivering quality and innovative solutions to customers. Mr Taylor expressed Biozone Scientific Group strong commitment to supporting our strategic goals

and ensuring continuous improvement in supply chain efficiency. Both parties agreed that transparency, consistent communication, and mutual respect remain key pillars in nurturing a productive and long-lasting partnership.

We also took this opportunity to discuss additional support needed, especially in marketing, branding and technical assistance to meet the growing market demand. Their readiness to support us in these aspects will certainly empower us to accelerate our operational plans while maintaining the highest quality standards for our customers.

We believe that with strong teamwork and aligned objectives, we will be able to deliver enhanced value to our stakeholders and continuously drive growth in this competitive market landscape.

MOU SIGNING CEREMONY WITH PERDA-TECH

Scientific and Technical Products Sdn.Bhd.(STP) has signed the MOU with PERDA Advanced Technical Institute (PERDA-TECH) on 27th February 2025, a subsidiary of Penang Regional Development Authority PERDA), is an institution that offers various skills training to graduates of the Malaysia Certificate of Education (SPM). It began operations in 1989 and it is currently operated under the Ministry of Rural and Regional Development. The purpose of this MOU is to establish strategic collaboration between workforce providers and technical workforce placements, as well as to share expertise and current technologies between institutions and industries. STP is one of the 5 industry partners involved in the MOU in the field of Cybersecurity Technology and we were represented by Our Group Chairman/Group Managing Director, Mr Tony Tee Boon Chai, accompanied by Mr Vincent

Lim and Mr. Syahril Emran Mohd Nor. On the other hand, PERDA-TECH was represented by The Chairman of PERDA, Datuk Wira Ir. Dr. Shaik Hussien Mydin, accompanied by Dato' Haji Mohd Asri Baharum@Harun (General Manager of PERDA), Mr. Zolkhifli Mohamed (Director of PERDA-TECH) and all the management team.

Thus, through this understanding (for a duration of 3 years), PERDA-TECH will be able to offer more new skill-based study programs that keep up with technological advancements and meet industry requirements. This ensures that the institution continues to contribute skilled labour to the nation. This strategic partnership will assess the current industry situation in Malaysia, while improving TVET's direction in resource planning in terms of knowledge, equipment/tools, and human capital development for all parties involved.

We had the privilege of hosting esteemed partners from IEG Korea—Dr. Cho Young Duke and Ms. Kelly Cho Kyung Hyung—on an official visit to Malaysia.

Representing IEG, a leader in cutting-edge educational technologies and resources, Dr. Cho and Ms. Cho specialize in innovative learning solutions that support academic and technical excellence in the fields of semiconductors and smart manufacturing.

The week-long visit was marked by a series of impactful engagements with key Malaysian institutions, including the German-Malaysian Institute (GMI), Faizuddin Center of Educational Excellence, Perda Tech Institution, and Universiti Teknikal Malaysia Melaka (UTeM). These visits included in-depth

presentations and discussions focused on the deployment and integration of IEG's educational solutions, particularly in support of emerging technology sectors.

At each institution, Dr. Cho and Ms. Cho showcased IEG's specialized educational platforms designed to bridge theoretical knowledge with practical industry needs. Their presentations highlighted how IEG's solutions can enrich technical curricula, providing students with hands-on experiences that closely simulate real-world industry environments—especially within the fast-evolving domains of semiconductor technology and smart factory systems.

Our shared belief is that preparing students for the demands of Industry 4.0 requires not only strong academic foundations but also access to state-of-the-art tools and applied learning environments. By collaborating with IEG, we aim to empower local institutions with the resources needed to develop future-ready talent for critical industries.

This visit marked a significant step toward international collaboration in technical education and reaffirmed our commitment to fostering global partnerships that drive innovation, workforce development, and sustainable growth in high-tech sectors.

A delegation from University Kuala Lumpur (UNIKL) visited for a special demonstration of the latest Hybrid Classroom solutions, marking a significant step forward in the university's digital transformation journey.

UNIKL's ICT team has been aggressively working to modernize their educational infrastructure with cutting-edge teaching tools and smart solutions. This initiative is part of their commitment to align with the latest pedagogical trends and the evolving needs of online and blended learning environments.

As a proud education technology partner, we had the opportunity to showcase our AI-powered Hybrid Recording and Broadcasting Classroom Solution to the visiting delegation. The demonstration featured several integrated technologies including: Interactive LED Panel, AI Tracking Camera, AI Recording Serve, Modern Mobile Learning Chairs and others Smart Classroom Facilities

Our solution aims to empower educators with seamless online and offline teaching capabilities, enhance student engagement, and enable flexible learning environments

through intelligent automation and intuitive design.

The visit proved to be both fruitful and insightful for all parties involved. The UNIKL delegation expressed great interest in the potential of these technologies to elevate the university's teaching and learning experience.

We look forward to exploring future collaboration opportunities with UNIKL as they continue their journey toward becoming a digitally-empowered, future-ready institution.

This initiative is part of their commitment to align with the latest pedagogical trends and the evolving needs of online and blended learning environments.

VISIT OF POLY DUNGUN

Galaxy Group of Company had the honour of welcoming a distinguished delegation from Politeknik Sultan Mizan Zainal Abidin (PSMZA) for an educational visit that fostered mutual learning, strategic insight, and the exploration of future collaborations.

The visit was graced by the presence of Hajah Zamra Binti Derahman, Director of PSMZA, accompanied by a delegation of 14 dedicated lecturers and 15 enthusiastic students. Their visit marked a significant step towards strengthening the connection between academia and industry, with the aim of aligning educational outcomes with evolving technological and professional standards.

During the session, the delegation was introduced to Hybrid Classroom Solutions, which exemplify cutting-edge digital learning environments designed to support blended and remote education. The guests also explored our High Technology Laboratory Equipment, gaining valuable insight into the advanced tools that support learning process within various industry sectors.

Another key highlight of the visit was the presentation of our Professional International Certification programs under ETA (Electronics Technicians Association International). These globally recognized certifications offer a pathway for students and professionals to validate their competencies and expand their career prospects across international borders.

The exchange of ideas and discussion during the visit reinforced the shared commitment of both institutions to innovation, quality education, and professional excellence. Galaxy Group of Company expresses its sincere appreciation for the visit and is enthusiastic about the potential for future collaborations in areas such as curriculum enhancement, internship placements, and joint technology development.

We extend our heartfelt thanks to Hajah Zamra Binti Derahman and the entire PSMZA delegation for making this visit a truly meaningful engagement. We look forward to a fruitful partnership that continues to bridge the gap between industry and education.

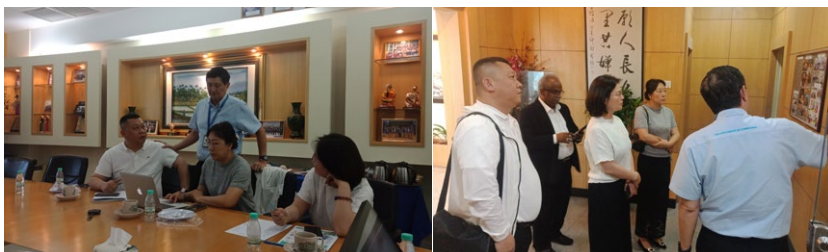

VISIT OF TWINTech INTERNATIONAL UNIVERSITY COLLEGE

The Galaxy Group of Companies recently welcomed a delegation from Twintech International University College for an official visit and discussion on future educational technology collaboration initiatives.

The delegation was led by Professor Dr. Zhao Jingjing and accompanied by Professor Dr. Selvaraj Oyyan Pilay. The visit provided an excellent platform for both parties to exchange ideas and explore innovative solutions to support the development of the university's new campus and learning environment.

During the visit, Galaxy Group presented its latest Digital High-Speed Printing Solutions, advanced educational delivery technologies, and Smart Hybrid Classroom solutions designed to enhance modern teaching, learning, and administrative efficiency. The session also featured demonstrations of smart interactive classroom systems, hybrid learning technologies, and integrated digital solutions aimed at supporting flexible and engaging educational experiences.

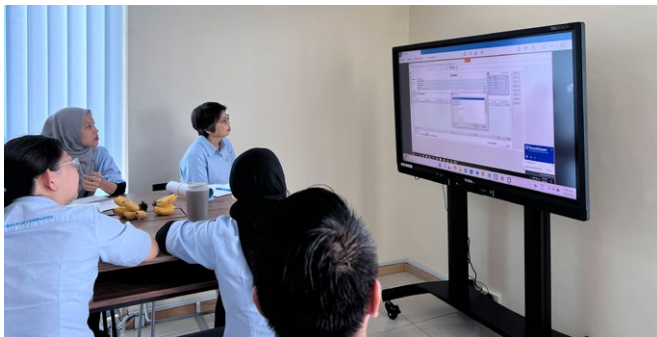

The discussions focused on how advanced digital technologies can help educational institutions improve productivity, streamline communication, and create more interactive and future-ready learning environments. Both parties expressed strong interest in exploring potential collaborations and partnerships in smart education and digital transformation initiatives.

The visit further strengthened the relationship between Galaxy Group of Companies and Twintech International University College, reflecting a shared commitment towards innovation, technology advancement, and the future of smart education in Malaysia.

IN HOUSE TRAINING ON E INVOICING

In line with the latest directive from Lembaga Hasil Dalam Negeri (LHDN) mandating the adoption of E-invoicing by *1st July 2025, Galaxy Group of Companies conducted a comprehensive training session on **9th May 2025* for all accounts and operations personnel across the Head Office and branch locations.

The half-day session, led by the Accounts Department, introduced the Group's new accounting software and provided an overview of the E-invoicing framework, including key document types such as invoices and debit/credit notes.

Participants engaged in hands-on exercises covering invoice creation, submission procedures, status tracking, and handling rejection responses. This session marks a crucial first step in ensuring a smooth and confident transition to a fully digital invoicing process.

VISIT OF UMS

Galaxy Group of Companies was honoured to welcome a distinguished delegation from the Digital Division of University Malaysia Sabah (UMS) for an official visit and technology engagement session at our premises.

The delegation was led by Chief Digital Officer, Professor Dr. Ag. Asri Ag. Ibrahim, and accompanied by Chief Technology Officer, Ts. Effendy bin Hadis.

The purpose of the visit was to explore Galaxy's latest advancements in educational technology and smart digital solutions, with particular focus on our Smart Hybrid Recording System with AI capabilities as well as the Smart Wireless Interactive Classroom and Meeting Room Solutions.

During the session, both parties exchanged insights on digital transformation in higher education and explored potential opportunities for collaboration in enhancing modern teaching and learning experiences through innovative and integrated technologies.

We greatly value this engagement and look forward to future collaboration with UMS in advancing smart education initiatives and digital innovation in the academic sector.

RISO TRAINING AT USM

USM School of Art is a Pioneers in using Risograph Printing in Malaysian Education.

We are proud to announce the successful installation of a Risograph printer at the School of Art, University Sains Malaysia (USM), making it the first educational institution in Malaysia to incorporate Risograph printing into its curriculum. With a four-colour drum setup, the machine is now available to students and lecturers, enabling hands-on exploration of colour layering, graphic textures, and independent publishing. This marks a new chapter in how printmaking is taught, experienced, and shared within an academic environment.

Risograph printing offers a unique blend of digital precision and analogue charm, producing bold, layered visuals with environmentally friendly soy-based inks. Globally embraced by contemporary artists and designers, Riso has become synonymous with experimentation, spontaneity, and accessibility. The School of Art's adoption of this technology invites students to create zines, posters, print editions, and collaborative works that push creative boundaries and encourage process-driven exploration.

This milestone reflects USM's commitment to innovation in art and design education. By integrating Riso into formal studies, the School of Art not only joins a global creative movement but also lays the foundation for a new generation of printmakers in Malaysia. We look forward to seeing how students use this tool to tell fresh visual stories and contribute to the evolving language of graphic arts.

GALAXY AUTOMATION HALF-YEARLY MEETING & CUSTOMER APPRECIATION DINNER 2025

Galaxy Automation Sdn. Bhd. (GA) successfully hosted its Half-Yearly Sales & Management Meeting, Product Exhibition, and Customer Appreciation Dinner on 24 October 2025 at The Pines Melaka. The event brought together the company's management team, employees, business partners, and valued customers for an evening dedicated to strategic alignment, innovation showcase, and relationship building.

The half-yearly meeting served as a key platform for management to review the company's performance and strategic direction for the second half of 2025. During the session, the leadership team shared updates on sales achievements, operational developments, ongoing projects, emerging business opportunities, and customer support initiatives aimed at strengthening GA's market position and long-term growth.

The half-yearly meeting served as a key platform for management to review the company's performance and strategic direction for the second half of 2025.

In conjunction with the meeting, GA hosted a Customer Appreciation Dinner as a gesture of sincere gratitude to its loyal customers and business partners for their continuous trust, confidence, and support. The evening provided an excellent opportunity to foster stronger business relationships, exchange industry insights, and explore future collaboration opportunities in a warm and engaging atmosphere.

A product exhibition was also held alongside the event, featuring GA's latest technologies and innovative solutions, including advanced automation systems, indoor air quality solutions, and smart interactive education and business technologies. Guests and prospective customers were given the opportunity to experience live product demonstrations and gain deeper insights into the company's capabilities in delivering innovative and value-driven solutions across various industries.

The event concluded on a highly positive note, receiving encouraging feedback from customers and participants alike. The successful gathering further reinforced GA's commitment to innovation, customer satisfaction, and sustainable long-term partnerships as the company continues advancing its growth journey within the evolving automation and technology industry.

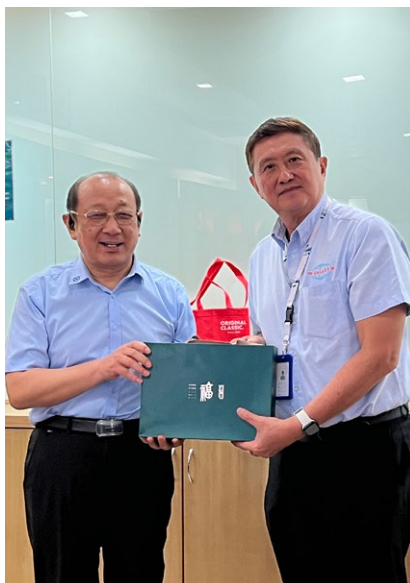

VISIT OF HENGXING GROUP, CHINA

The Galaxy Group of Companies recently had the honour of welcoming a distinguished delegation from Hengxing Group, China, led by Group Chairman Mr. Chen Changjin together with Overseas Director Professor Zhao Jingjing, for an official corporate visit and business networking session in Malaysia.

The nine-member delegation visited Galaxy Group as part of Hengxing Group's regional engagement and strategic expansion initiatives in Southeast Asia. The visit follows the group's acquisition of Twintech International University College of Technology under the overseas expansion programme of Hengxing Higher Education Group.

The visit provided a valuable platform for both parties to strengthen mutual understanding, exchange industry insights, and explore potential collaborations in advanced educational technologies and digital transformation solutions.

Discussions focused on smart educational delivery systems, including digital learning environments, smart campus technologies, and innovative education management solutions. Both parties also explored opportunities in digital documentation systems, digital printing technologies, and automation solutions to enhance operational efficiency in their Twintech campus and support future-ready business ecosystems.

During the visit, the delegates were also treated to a selection of local fruits from the orchard of Galaxy Group Chairman, including local and Japanese mangosteens, duku langsung, rambutan, and dokong. The guests greatly enjoyed the unique tropical fruit experience.

VISIT OF MOT

The Galaxy Group of Companies recently had the pleasure of welcoming representatives from the Ministry of Transport Malaysia (MOT) to our showroom for a presentation and update on our latest document management and managed print service solutions.

The visit provided an excellent platform for our team to showcase the latest technologies and innovations designed to support modern workplace printing and document management requirements. During the session, our specialists introduced the latest RISO high-speed printing

solutions, HP multifunction printer (MFP) technologies, software monitoring systems, and intelligent data capture solutions aimed at enhancing workflow efficiency, strengthening document security, and improving operational cost management.

Following the presentation, the delegates were invited to participate in live demonstrations and hands-on product showcases at our showroom. The interactive session enabled the visitors to gain deeper insights into the capabilities, functions, and practical benefits of the machines and software solutions in supporting more efficient and productive workplace operations.

We sincerely appreciate the visit by the representatives from MOT and value the opportunity to share our latest innovations and industry expertise. We believe the session provided meaningful insights and valuable exposure that will support their future operational planning and decision-making initiatives.

The Galaxy Group of Companies recently welcomed a distinguished delegation from Anhui Wenxiang Information Technology Co., Ltd., China, led by Miss Meris Miao, for a corporate visit and business networking session aimed at strengthening international collaboration and fostering strategic partnerships.

The visit provided an excellent platform for both organisations to enhance mutual understanding, exchange industry perspectives, and explore potential collaboration opportunities in the areas of educational technology, digital innovation, and smart learning solutions.

During the visit, the delegation was given a comprehensive tour of Galaxy Group's facilities and showroom, where they

experienced the Group's latest technological advancements and innovative educational solutions. A productive business meeting was also conducted, enabling both parties to engage in meaningful knowledge sharing and exchange ideas on future industry developments.

The visit reflects Galaxy Group's ongoing commitment to strengthening international business relationships and expanding its network of strategic global partnerships. It also marks another significant milestone in fostering regional business connectivity and paving the way for future cooperation opportunities that deliver mutual growth and long-term value for both organizations.

VISIT OF WENTECH

VISIT OF UMT

Our company had the pleasure of welcoming the e-Learning Team from Universiti Malaysia Terengganu (UMT) for a technology exposure and knowledge-sharing session. During the visit, our team conducted a series of presentations and live technology demonstrations showcasing the latest innovations and solutions in digital learning and educational technology. The session also provided a valuable platform for both parties to exchange insights, discuss emerging technology trends, and explore potential areas for future collaboration.

Following the discussions and demonstrations, both parties agreed to proceed with a two-week Proof of Concept (POC) implementation at University Malaysia Terengganu (UMT). The initiative aims to evaluate the effectiveness, functionality, and suitability of the proposed solutions within the university's learning environment.

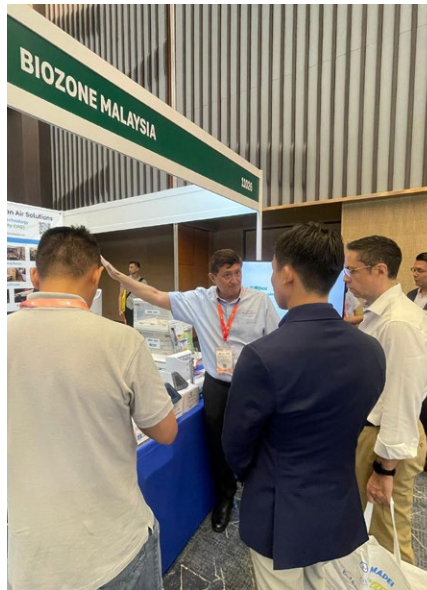

The visit marked a positive step towards strengthening industry-academia collaboration while supporting innovation and digital transformation in the education sector.

The initiative aims to evaluate the effectiveness, functionality, and suitability of the proposed solutions within the university's learning environment.

BIOZONE IAQ AT FHM EXHIBITION

Galaxy International (GI) participated in the Food & Hospitality Malaysia Exhibition (FHM) at Kuala Lumpur Convention Centre from 23rd to 26th Sept 2025., around 1500 vendors participated in the exhibition throughout 11 halls from many countries and from F&B (Restaurants, Cafe, Food Manufacturing) and Hospitality (Hotels, Travel & Tourism) industries.

There are more than 20,000 visitors during the exhibition from Malaysia and other Southeast Asian countries such as Singapore, Indonesia, Brunei, Cambodia, Laos, Myanmar, Philippines, Thailand, and Vietnam. We received many enquiries from potential customers during the show and we are looking forward for more Biozone IAQ system installations in the next 2 to 3 quarters.

We are looking forward for more Biozone machines installation in the next 2 to 3 quarters

GALAXY IN-HOUSE EXHIBITION

On 12 August last year, Galaxy successfully hosted an in-house exhibition at the GA Showroom, bringing together customers, partners, and industry professionals to experience the latest advancements shaping the future of the printing industry.

The exhibition was organized in response to the rapid transformation of the market over the past five years, particularly following the post-pandemic shift toward digitalization, automation, and Industry 4.0 technologies within Malaysia's printing sector.

The event served as a strategic platform for Galaxy to introduce a comprehensive range of next-generation printing and finishing solutions from its global principal partners, reaffirming the Group's commitment to innovation and technology leadership.

A major highlight of the exhibition was the debut presentation of the RISO VALEZUS T-1200 Inkjet Printing System a high performance production solution engineered for durability, productivity, and efficiency. Capable of delivering up to 30 million prints at a speed of 165 pages per minute, the system was showcased with a complete configuration comprising a high-capacity feeder, face-down finisher, and multifunction finisher.

Galaxy also featured an extensive range of HP multifunction office solutions, offering print speeds from 23ppm to 70ppm in both monochrome and colour models, alongside the latest HP DesignJet plotter solutions for large-format printing applications.

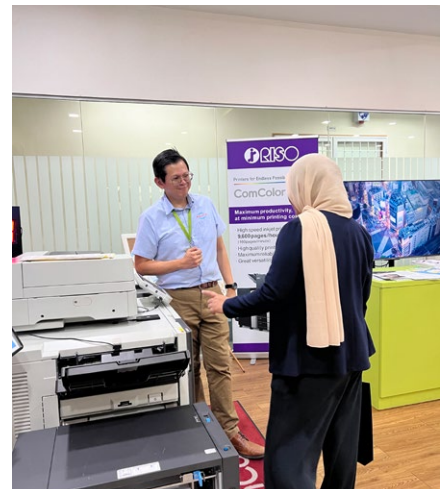

In the area of digitization and document preservation, visitors were introduced to advanced Zeutschel technologies, including book scanners, scanning tables, microfilm cameras, exposure systems, and integrated capturing and editing software solutions designed for archival and institutional requirements.

The exhibition further demonstrated Galaxy's comprehensive post-press capabilities through a wide range of Duplo finishing solutions, including folders, collators, booklet makers, die cutters, binders, slitter-cutter-creasers, and digital spot UV coaters – providing customers with complete end-to-end finishing workflows.

Another key milestone during the event was the official launch of the ZENO 300 Layflat, an entry-level solution developed for digital photobook production, offering customers greater flexibility and accessibility in personalized print applications.

“ The exhibition further demonstrated Galaxy's comprehensive post-press capabilities through a wide range of Duplo finishing solutions ”

The exhibition also marked the soft opening of BN Technology's regional showroom, located within the same building. The showroom featured the BNi Duplex Coating B2 Portrait System, further strengthening the portfolio of advanced printing and coating technologies available to the market.

Overall, the in-house exhibition successfully highlighted the evolving direction of the printing industry while reinforcing Galaxy's position as a trusted technology solutions provider committed to delivering innovative, integrated, and future-ready solutions to its customers.

SALCON BERHAD VISIT

Salcon Berhad recently paid a courtesy visit to Galaxy Group of Companies, led by Mike Leong and accompanied by Patrick Tee and Rizal.

The visit served as a strategic platform for both parties to exchange insights and explore Galaxy Group's innovative business solutions, including the Biozone Indoor Air Quality (IAQ) Solution, Smart Wireless Meeting Room Solution, and in-house Digital Printing Solutions.

During the engagement, the delegates were introduced to technologies designed to support smarter and more sustainable workplace environments by enhancing operational efficiency, improving collaboration, optimising time management, and reducing operational costs. The session also reinforced a shared commitment towards digital transformation and the adoption of intelligent workplace solutions that drive long-term business value and productivity.

OMEGADEN LABORATORY VISIT

OMEGADEN Laboratory recently hosted a business visit focused on exploring indoor air quality enhancement solutions for its office and laboratory facilities. As a leading dental solutions provider, OMEGADEN Laboratory specialises in a comprehensive range of dental products and services, including fixed and removable prostheses, orthodontics, advanced digital solutions, and specialised framework systems for the dental industry.

The visit was led by Managing Director, Devin Wong, together with Zak. During the engagement, discussions centred on the introduction of the Biozone Indoor Air Quality (IAQ) Solution and its role in supporting a cleaner, safer, and healthier working environment within laboratory and office spaces.

The session also highlighted the growing importance of sustainable workplace solutions in healthcare-related industries, particularly in enhancing air hygiene standards, improving employee well-being, and creating a more comfortable environment for both staff and clients. The engagement reflected OMEGADEN Laboratory's commitment towards adopting innovative technologies that support operational excellence and a higher standard of workplace safety.

RISO VISIT

Galaxy Automation Sdn Bhd recently welcomed a visit from the RISO principal representative as part of their regular engagement with customers in Malaysia (March 2026).

The visit included key sites such as the Road Transport Department Malaysia - Automated Awareness Safety System (JPJ AwAS) and Hospital Tengku Ampuan Rahimah (Klang), reinforcing RISO's commitment to maintaining strong relationships and ensuring optimal machine performance. These periodic visits are essential for assessing operational efficiency, gathering user feedback, and identifying opportunities for continuous improvement in real working environments.

These periodic visits are essential for assessing operational efficiency, gathering user feedback, and identifying opportunities for continuous improvement in real working environments.

At JPJ AwAS, the team highlighted their positive experience with RISO ComColor Inkjet technology. The preference for RISO's cool printing technology has enabled consistent, high-volume output without compromising document integrity. Impressively, the system has demonstrated the high reliability and capability supporting the department's demanding operational requirements.

Meanwhile, Hospital Tengku Ampuan Rahimah (Klang) shared insights on their heavy monthly usage. The RISO ComColor FT 1430 machine has proven to be well-suited for such intensive workloads, delivering stable performance and meeting the hospital's high-volume printing needs. Feedback gathered during the visit will contribute to further enhancements, ensuring that RISO solutions continue to align with the evolving demands of both government enforcement and healthcare sectors.

We are honoured to be invited as an exhibitor for Industry Engagement Day (NexTECH 2025), organised by the Technology Faculty Oceanic Engineering studies (FTKK), Universiti Malaysia Terengganu (UMT). The event was held on 17 December 2025 (Wednesday) at Dewan Sultan Mizan, UMT.

Carrying the theme “Meneraju Inovasi Teknologi bersama Industri”, NexTECH 2025 served as an annual platform aimed at strengthening strategic collaboration between academia and industry players. The programme brought together organisations involved in marine engineering technology, electronics and instrumentation, environmental technology, as well as renewable energy sectors to exchange ideas, showcase innovations, and explore future opportunities for collaboration.

As part of the exhibition, participating organisations had the opportunity to engage directly with students, academicians, and fellow industry representatives through exhibition booths and networking sessions. The event reflected UMT’s continuous commitment towards bridging industry and academia in driving technological advancement and innovation.

Our participation in this meaningful initiative further strengthened industry-academia relationships and supported ongoing efforts towards the development of future talent and technological excellence.

further strengthened industry-academia relationships and supported ongoing efforts towards the development of future talent and technological excellence.

FIM INNOVATION EXHIBITION

Our company was honored to participate as an exhibitor at the FIM Innovation Exhibition 2025 (FIMiEx2025), organised by the Faculty of Industrial Management (FIM), Universiti Malaysia Pahang AI-Sultan Abdullah (UMPSA). The two-day exhibition was held from 29–30 November 2025 at BCIC Lodge Hotel, Kuantan, Pahang.

FIMiEx2025 brought together industry players, government agencies, higher learning institutions, schools, and local communities to showcase innovative products, research achievements, and emerging technologies. The event attracted more than 300 participants comprising of academics, students, researchers, and industry representatives, creating a dynamic platform for collaboration and knowledge exchange.

The exhibition provided valuable opportunities for participating organisations to strengthen strategic partnerships with academia while promoting innovation-driven solutions that support sustainable growth and community development. It also reinforced the growing importance of industry-academia collaboration in accelerating digital transformation and future-ready education initiatives.

The successful implementation demonstrated how advanced hybrid learning technologies can enhance teaching effectiveness

A key highlight during the exhibition was the showcase of our Hybrid Classroom Solution implemented at the Faculty of Industrial Management, UMPSA. The integrated digital learning solution received encouraging response and strong interest from visitors, lecturers, and representatives from various faculties. The successful implementation demonstrated how advanced hybrid learning technologies can enhance teaching effectiveness, improve student engagement, and support the evolving demands of modern education environments.

CSR ACTIVITIES

Galaxy Group of Companies, through its Galaxy Recreation Club (GRC), continues to uphold its commitment to Corporate Social Responsibility (CSR) by actively contributing to community development and educational enhancement initiatives.

As part of the company's ongoing CSR efforts, a series of meaningful community outreach programmes were carried out during July and August 2025, reflecting Galaxy Group's dedication to creating a positive and lasting social impact.

The initiatives focused primarily on supporting educational institutions and improving learning environments for students and educators. Contributions were extended to several schools, including SK Pendek Alor Taji, SK Juru Ulu, SK Pendek Alor, SPA Kg. Bidor, and SK Desa Aman. Among the key contributions was the donation of computer desks coordinated through the Galaxy Recreation Club (GRC), aimed at enhancing the functionality, organization, and overall comfort of school computer labs and classrooms.

The recipient schools expressed sincere appreciation for the contributions, noting that the upgraded facilities have helped create a more conducive, organized, and effective environment for teaching and learning. These improvements are expected to further support students' educational experiences and encourage greater engagement in digital learning activities.

Galaxy Group firmly believes that education is a fundamental pillar in shaping future generations and building stronger communities. Through continuous investment in educational support initiatives, the company aspires to empower students, assist educators, and contribute meaningfully to the nation's future development.

These CSR initiatives reflect Galaxy Group's long-term commitment to social responsibility, community empowerment, and sustainable development, while reinforcing the company's vision of building a better future together with the communities it serves.

FOOTBALL TEAM SPONSORED BY GALAXY

Football is one of the most popular sports in Malaysia even though Sepak Takraw, also known as kick volleyball, is the national sport of Malaysia. Sport has the power to foster unity among people, regardless of race, ethnic background, religion or social status. It provides a common platform where Malaysians from different backgrounds can come together as athletes, spectators, and fans, fostering mutual respect and understanding.

Galaxy Group is proud to sponsor new jerseys for the RBZ Legazy U14 football team of Kuala Lumpur for the 2025 season. With this sponsorship, the team is more motivated and ready to compete in the Klang Valley Young League as well as participate in a series of friendly matches across states in Malaysia.

This sponsorship not only enhances the team's image but also motivates the players to achieve better results. At the same time, it reflects Galaxy Group's commitment to supporting sports development and strengthening ties with the community. The RBZ Legazy team expresses its appreciation and gratitude for the support given.

New Year Eve 2026 Luncheon

As the year drew to a joyful close, the Galaxy Group of Companies hosted its New Year's Eve Luncheon on 31 December 2025 in a vibrant atmosphere of appreciation, friendship, and festive cheer. The event brought together Galaxians from various departments to reflect on the year's achievements and shared memories while welcoming the new year with optimism and unity.

The luncheon featured a delightful spread of festive dishes, cookies, and sweet treats enjoyed by all staff. The warm gathering offered an excellent opportunity for employees to unwind, connect, and further strengthen camaraderie across the organisation.

Adding excitement to the celebration was an interactive online Bingo game held after the luncheon, which sparked laughter, teamwork, and friendly competition among colleagues. Attractive prizes for individual and team categories, generously sponsored by the Group Chairman, made the activity even more engaging and memorable.

The celebration also included a much-anticipated gift exchange, where employees shared thoughtful presents and heartfelt wishes. This reflected the values of gratitude, generosity, and togetherness that define the Galaxy family culture.

More than a year-end gathering, the New Year's Eve Luncheon served as a meaningful occasion to strengthen employee bonds and reaffirm the company's commitment to a positive, inclusive, and engaging workplace culture.

Hari Raya Hamper Distribution

The annual distribution of Hari Raya hampers has become a cherished tradition within the Galaxy Group of Companies, symbolising the organisation's heartfelt appreciation for its employees while embracing the joyous spirit of Ramadan and Hari Raya Aidilfitri. More than a festive gesture, this meaningful initiative reflects the company's values of gratitude, unity, and inclusiveness, fostering a warm and harmonious workplace culture among employees of all backgrounds.

As a company with a predominantly Muslim workforce, Galaxy Group places great importance on recognising and honouring the significance of Ramadan and Hari Raya Aidilfitri. The annual hamper distribution not only celebrates the festive season but also reinforces the company's commitment to mutual respect, cultural appreciation, and togetherness within its multicultural working environment.

Adding a truly personal touch to this tradition is the involvement of the Group Chairman, Mr. Tony Tee, who personally prepares the Hari Raya hampers for employees each year. His thoughtful gesture serves as a sincere token of appreciation for the dedication, hard work, and commitment demonstrated by employees throughout the year. More importantly, it reflects the company's people-first culture, where employees are valued not only for their contributions at work, but also as an integral part of the Galaxy family.

Carefully curated with festive delights such as traditional kuih raya, dates, nuts, dried fruits, premium Halal-certified chocolates, and traditional beverages, the hampers are thoughtfully prepared to spread festive joy and warmth to employees and their families. Each hamper is accompanied by a heartfelt greeting and appreciation card personally signed by Mr. Tony Tee, making the gesture even more meaningful and memorable.

Distributed ahead of the festive holidays, the hampers allow employees to bring home the spirit of celebration and share the joy of Hari Raya Aidilfitri with their loved ones. Beyond the festive season, this long-standing tradition continues to strengthen the bonds of appreciation, loyalty, and unity across the Galaxy Group of Companies, reflecting the true spirit of togetherness that defines the organisation.

Gemarak Ramadhan Rendang and Nasi Impit Distribution

In the true spirit of Ramadan and inspired by the theme "Semarak Ramadan with Galaxy", the Galaxy Group of Companies, through the GRC Club CSR initiative, successfully brought together Galaxians in a meaningful community outreach programme held two weeks prior to Eid al-Fitr. The initiative reflected the organisation's commitment to fostering compassion, unity, and social responsibility during the blessed month of Ramadan.

As part of the festive preparations, employees from various departments actively participated in the preparation of traditional Ramadan delicacies, namely Rendang Ayam (chicken rendang) and Nasi Impit (compressed rice cakes). The activity celebrated Malaysia's rich cultural heritage while embracing the spiritual values of togetherness, generosity, and gratitude that define the holy month. Beyond preparing meals, the programme also strengthened teamwork, camaraderie, and employee engagement through collective participation and shared contributions.

More than 300 meal packs were successfully prepared and distributed to fellow staff, tenants, and members of the surrounding community. The distribution extended warmth and goodwill to those in need while fostering stronger community relationships and promoting the spirit of caring and sharing during Ramadan.

The initiative further demonstrated the company's ongoing commitment to Corporate Social Responsibility (CSR) and its dedication to cultivating a caring, inclusive, and socially responsible workplace culture. The event was a memorable occasion filled with cooperation, unity, and appreciation, as employees worked hand in hand to ensure the programme's success. Their collective efforts truly embodied the values of kindness, harmony, and community spirit that are deeply cherished during the holy month of Ramadan.

Buka Puasa With Galaxy Staff

During the holy month of Ramadan, the tradition of breaking fast together with family members, friends, relatives, and colleagues holds deep cultural and religious significance within the Muslim community. The evening meal to break the fast at sunset, known as Iftar in Arabic, is a meaningful occasion that brings people together in the spirit of gratitude, unity, compassion, and togetherness.

Beyond fulfilling a religious practice, Iftar serves as an opportunity for Muslims to strengthen relationships, offer prayers, share meals, and foster a greater sense of community during this blessed month. It reflects the values of mutual respect, care, and harmony that are deeply embedded in the spirit of Ramadan.

In line with these meaningful values, the Galaxy Group of Companies continues its annual tradition of organising a fast-breaking gathering with our Muslim Galaxians. The event provides an avenue for employees from different backgrounds to come together in a warm and harmonious environment, further strengthening friendship, teamwork, and mutual appreciation among staff members.

As part of our ongoing commitment to promoting unity and inclusiveness within the workplace, this yearly gathering also reflects Galaxy Group's appreciation for cultural diversity and the importance of nurturing strong bonds among our employees. The occasion not only celebrates the spirit of Ramadan but also reinforces the company's family-oriented culture and commitment to building a caring and respectful working community.

Mandarin Orange Distribution

The distribution of mandarin oranges is a cherished annual tradition within the Galaxy Group of Companies, reflecting the rich cultural values and festive spirit of the Chinese New Year celebration.

In Chinese culture, mandarin oranges – known as “kam” (柑) in Cantonese – are closely associated with prosperity and fortune, as the word sounds similar to “gold” (金), while “cheng” (橙) symbolizes success (成). Their vibrant golden colour and round shape further represent abundance, unity, happiness, and completeness.

As part of the yearly festive celebration, mandarin oranges were distributed to employees as a meaningful gesture of appreciation, goodwill, and blessings for a prosperous year ahead. Beyond the tradition of gift-giving, the initiative reflects the company’s commitment to fostering a harmonious workplace culture while strengthening the bond among Galaxians through the sharing of cultural values and festive joy.

In many Asian communities, mandarin oranges are exchanged during the Lunar New Year as a customary symbol of respect, good fortune, and well wishes. The distribution ceremony concluded with each employee receiving one to two boxes of mandarin oranges to bring home and share with family members, relatives, and friends. Through this simple yet meaningful tradition, Galaxians were reminded that true prosperity extends beyond material wealth to include good health, strong relationships, unity, and lasting harmony.

Lunar New Year Opening Day 2026

As the festive spirit of the Lunar New Year continued, the Galaxy Group of Companies welcomed the Year of the Horse with its Chinese New Year Office Opening Ceremony on 20 February 2026, marking the fourth day of the celebration. Galaxians at Headquarters returned from the holiday break in high spirits to begin the new year with positivity and unity.

The ceremony began with a morning prayer session, symbolising gratitude, blessings, and aspirations for a prosperous year ahead. This was followed by the distribution of Ang Pows (red packets) by the Senior Management Team led by Group Chairman, Mr. Tony Tee. In Chinese culture, Ang Pows represent prosperity, happiness, good health, and good fortune, reflecting the company's appreciation and well wishes to all employees.

Adding vibrant energy and festive excitement to the occasion, a traditional lion dance performance toured the offices at Headquarters beginning at 9:30 a.m. Deeply rooted in Chinese cultural heritage, the lion dance is believed to usher in prosperity, attract positive energy, and ward off negative influences and misfortune. The lively drumbeats, dynamic performances, and cheerful atmosphere brought joy and enthusiasm to the workplace, creating a memorable start to the new working year.

In respect of the fasting month observed by Muslim colleagues, the company did not organise the usual Chinese New

Year luncheon this year, reflecting Galaxy Group's values of inclusivity, mutual respect, and cultural harmony within its diverse workforce.

The celebration strengthened unity, optimism, and togetherness among employees while reinforcing team spirit and employee engagement for the year ahead. The ceremony concluded with the presentation of a prosperity fruit platter by the lion dance troupe, followed by the symbolic firecracker ceremony and a group photography session, marking an auspicious start to the new year.

Chinese New Year Dinner with STS staff in Sabah

Shining Star Trading Sdn. Bhd. welcomed the Lunar New Year with a heartwarming and joyous celebration at its annual Chinese New Year dinner, held at the esteemed ITCC Seafood Restaurant. The gathering brought together employees and their families for an evening filled with festive cheer, culinary indulgence, and meaningful appreciation.

The event was further honoured by the presence of Group Chairman, Mr. Tony Tee Boonchai, whose attendance added significance and warmth to the occasion, uplifting the overall festive spirit. Hosted in a private dining room equipped with a karaoke system, the evening unfolded in a relaxed and vibrant atmosphere, encouraging camaraderie and celebration among all attendees. Guests were treated to a delightful selection of signature seafood dishes, showcasing the restaurant's renowned culinary offerings.

A special highlight of the night was the lively karaoke performances by Mr. TonyTee and Mr. Myron, which brought added entertainment and joy, creating memorable moments shared among colleagues and family members.

Earlier that day, during the staff meeting, Mr. Tee took the opportunity to express sincere appreciation to long-serving employee, Ms. Yong Lee Yen. In recognition of her remarkable 22 years of dedicated service, she was presented with a token of appreciation in the form of an angpaw, accompanied by heartfelt wishes for continued prosperity, good health, and happiness.

The celebration reflected not only the festive spirit of Chinese New Year but also the company's strong culture of gratitude, unity, and appreciation for its people. The event was attended by staff from Sabah HQ in Kota Kinabalu, as well as branches in Sandakan, Tawau, and Labuan, making it a truly meaningful occasion that strengthened bonds across the organisation.

COLOUR PRINTING JUST GOT A LOT MORE AFFORDABLE.

When training materials rely on diagrams, flowcharts, and colour-coded instructions, printing in black and white can compromise understanding. Often, it's simply a habit formed around costs that no longer apply.

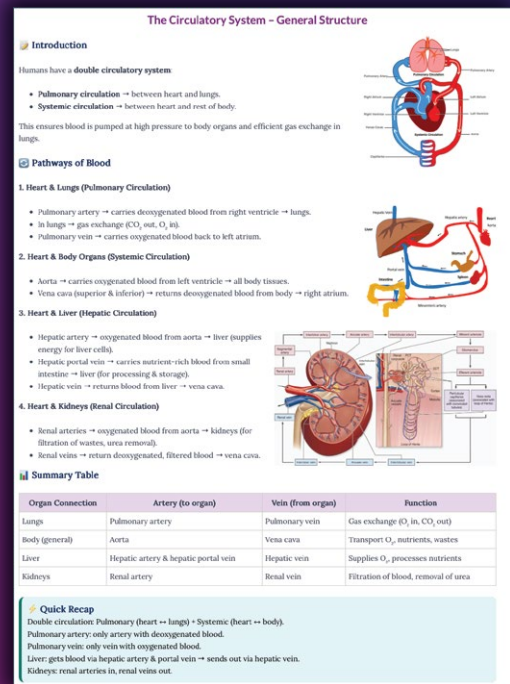

With **RISO ComColor** full-colour printing costs from **RM 0.06/page*** - often lower than the current black-and-white cost on a typical office printer. No minimum print runs. No outsourcing delays. Just fast, affordable colour printing whenever you need it.

BLACK AND WHITE (MONO)

VS

FULL COLOR

Colours lost. Details harder to understand. Important steps can be overlooked.

Colours communicate. Steps are clear. Learning is faster. Retention is better.

SAME CONTENT. DIFFERENT OUTCOMES.

**FULL COLOUR AT
RM 0.06/PAGE***
A fraction of typical office
colour printing costs.

**NO MINIMUM
PRINT RUN**
Print exactly what you need,
when you need it.

**UPDATE TRAINING
CONTENT ANYTIME**
Without wasting stock on
outdated versions.

**CLARITY THAT DRIVES
UNDERSTANDING**
Diagrams, flowcharts, and
safety steps stay sharp and
colour-coded - not lost in
grayscale.

**EXCEPTIONAL PRINT
SPEED**
Print 140 pages per minute -
1,000 sheets in less than 10
minutes.

**PROFESSIONAL
FINISHING OPTIONS**
Options of stapling and
booklet.
